EXPERIENCE

Amazon - Software Development Engineer Intern

June 2025 - August 2025

Bangalore

- Contributed to the development of xApp rollout tracking system for Alexa Voice Service
- Assisted in monitoring and analyzing OTA (Over-The-Air) update deployments across different device segments
- Worked with senior developers to implement tracking solutions
- Participated in daily stand-ups and team meetings

Amazon Future Engineer - DSA Scholar

April 2024 - February 2025

- Selected for prestigious Amazon Future Engineer scholarship program focusing on advanced Data Structures and Algorithms
- Participated in intensive training sessions covering fundamental and advanced DSA concepts
- Maintained a high performance rate in weekly assessments, consistently scoring above 80%

EDUCATION

Gokaraju Rangaraju Institute of Engineering and Technology

Hyderabad, Telangana

Bachelor of Technology in Information Technology (CGPA:8.98)

2023 - 2027

PROJECTS

MOODMATCH | *Generative AI tools*

- Learned and used Prompt Engineering and problem-solving techniques to design the product idea.
- Did market research and created user personas with AI tools to understand customer needs
- Used tools like Gamma AI, Namelix, and Sologo AI to build the brand, design, and pitch the MVP

SAWIT.AI Chatbot | *Python, OpenAI, LangChain*

- Built an RAG AI Chatbot based on previous project, MOODMATCH
- It uses RAG to give smart and personalized answers

Deploying AWS Application | *Amazon S3, CloudFront, EC2, Route53*

- Deployed my first AWS application using services like S3 and CloudFront through a hands-on workshop.
- Explored key cloud concepts like serverless computing, DNS, and CDN to build a scalable and efficient web solution

RealMArt Dashboard | *Power BI, Microsoft Excel, SQL*

- Built an interactive retail analytics dashboard using Kaggle datasets to visualize sales trends and inventory insights
- Explored key cloud concepts like serverless computing, DNS, and CDN to build a scalable and efficient web solution

Wikipedia Search Application | *HTML, CSS, JS, REST API Calls, Bootstrap*

- Developed custom wikipedia search application where user can search and view curated results and can see detailed explanation in wikipedia by clicking on the specific result
- Fetched search results from server asynchronously using fetch GET HTTP API call. When a user clicks on a particular result, opens the website in a new tab by using the target attribute of the anchor tag in HTML.

TECHNICAL SKILLS

Languages: Java, Python, C, SQL, JavaScript

Technologies: HTML, CSS, ReactJS

Developer Tools: Git, PowerBI, AWS, Kaggle

ACHIEVEMENTS

- Amazon FFE-AFE Scholarship – awarded for academic and innovation excellence
- Offered scholarship by Telangana government for (7808) rank in EAMCET examination
